More than the Multivitamin

**Advanced Metabolic Detoxification Strategies** | 45
**Kristi Hughes, ND** | Based on an interview with Nancy Faass
Detox not only helps those with weight-loss goals, but also serves a therapeutic purpose for those at risk of metabolic syndrome, blood sugar and insulin dysregulation, and cardiovascular disease. Clinical management of fatigue and generalized pain using therapeutic detoxification strategies often results in improved energy and tissue repair. A personalized care approach, guided by a comprehensive biotransformation and elimination assessment, can support tissue regeneration and enhanced cellular function.

**A Medicopolitical Plot in Austria Against the Natural Anticancer Agent Ukrain** | by Professor Serge Jurasunas | 108
Ukrain has been widely used in Europe for 34 years as an alternative treatment for cancer. But in September 2012, developer Dr. Wassil Nowicky was arrested and all stock seized. Prof. Jurasunas calls on the international community to speak out against this threat to medical freedom.

**A Critical Evaluation of Dietary Recommendations in the Edgar Cayce Readings: Part 1** | 114
by Barry S. Kendler, PhD, FACN, CNS, and Michael J. Glade, PhD, FACN, CNS
In the early part of the 20th century, psychic Edgar Cayce was known for answering questions about healing while in a hypnotic trance. This article looks at his nutritional advice in the light of modern dietary guidelines, finding striking similarities as well as serious errors.

## Letter from the Publisher

continued from page 8

but I had started my own private practice and decided not to continue it. In 1983 I thought that we really needed a forum for alternative doctors to regularly discuss treatments and diagnostics. So the *Townsend Letter for Doctors* was launched as an 8-page newsletter. At that time a chelation group, the American Academy of Medical Preventics, held large meetings twice yearly. AAMP was probably the most successful early group to bring alternative doctors together for sharing and learning. Garry Gordon, MD, was one of the founders of the group that eventually became the American College for the Advancement in Medicine. When I approached the members of AAMP asking if they would like a newsletter, they widely supported the idea, and so the *Townsend Letter for Doctors* had a ready-made audience. Companies exhibiting at AAMP's meetings were agreeable to advertise in the fledgling newsletter. It was a hobbyhorse, and I thought that I would give it a try for several years and see what sort of forum it would become.

### Best of the *Townsend Letter*

Townsend Letter for Doctors

Issue #1 – January 1983

Having been the editor of my high-school paper and college engineering magazine, editing and publishing the *Townsend Letter* filled a "hole" in my professional work. With the newspaper and college magazine, there was a team of writers; unfortunately, the early *Townsend Letter for Doctors* had only a few staff writers. Looking over a 24-page issue #25 from April 1985 reminded me more of the high-school paper than the college magazine. The headlines on the front page were typical for that period: "Current Status of Pepper
