Prescribe Alpha-Stim® to Help Your Patients Experience Life...AGAIN™

Safe, Effective and Proven Management of People in Pain

Simultaneously Treats Pain, Anxiety, Insomnia and Depression

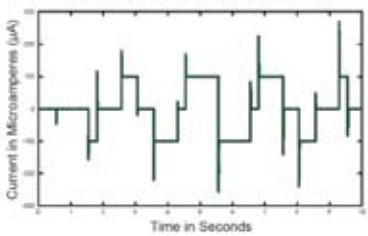
What is the Alpha-Stim® M?

The Alpha-Stim® M is a prescriptive medical device used for the management of anxiety, insomnia, depression and pain. Alpha-Stim® M provides your patients' a safe, effective and proven alternative to drugs especially in disorders that require long-term management. After treatment, there are no physical limitations imposed so your patients can immediately resume their activities of daily living (ADL). The treatment is simple and easily self-administered at any time. Patients using the Alpha-Stim® M usually report a pleasant, relaxed feeling of well-being accompanied by an alert mind and significantly reduced pain.

What Makes Alpha-Stim® Unique?

It's the waveform and how it is applied. Alpha-Stim® generates a unique and proprietary waveform that no other device can replicate. The waveform in a therapeutic device is analogous to the precise chemical compound that differentiates one drug from another. Alpha-Stim's® waveform is distinctive in its proven safety and efficacy. It also has unique protocols that make it easy to conduct 2 to 5 minute pain treatments on the body followed by treatment of the brain designed to bring the pain level all the way to 0, even in the toughest patients. By using the Alpha-Stim® waveform correctly on the pain site, spine and brain the results are lasting and cumulative.

The Patented Alpha-Stim® Waveform



Most Patients Experience Significant Pain Relief, Enjoy a Better Mood, and Sleep Longer and Deeper

- ✔ Simultaneously Treats Pain, Anxiety, Insomnia and Depression
- ✔ Proven Effective In Many Double-Blind Studies
- ✔ Most Research of Any Therapeutic Device
- ✔ Research Being Funded by DOD, VA, NIH, NCI
