WHAT DO THESE WELL-KNOWN DOCTORS KNOW THAT YOU DON'T KNOW?

"Likely the most powerful stimulant of the immune system ever developed."*

Dr. Julian Whitaker, author of: *Whitaker Health and Healing Newsletter***

"ProBoost is first aid for an aging immune system."*

Robert Rountree, M.D., author of *Immunotics. Your Personal Immune Boosting Program***

"The best immune system supplement available."*

Jacob Teitelbaum, M.D., author of *From Fatigued to Fantastic***

For more than 14 years, ProBoost® Thymic Protein A has been the choice of many doctors for immune deficiencies.

They have seen personal evidence of its efficacy among their patients, and are aware of peer-reviewed studies—like **"Improved Immune Activation Markers in Chronic Fatigue and Immune Dysfunction Syndrome (CFIDS) Patients Treated with Thymic Protein A"**** *Journal of Nutritional & Environmental Medicine (2001) 11, 241-247*—that show its ability to support immune function.

Thymic Protein A (TPA) is the only biomolecule utilized by the thymus gland to "activate" T-4 (CD4) helper cells,* which function as the central regulators of cellular immunity. After adolescence, the thymus gland shrinks, constantly reducing its ability to produce TPA. ProBoost, a unique, patented form of TPA—produced without degradation—is a quantum leap beyond ordinary thymic preparations in terms of clinical efficacy.

ProBoost:

- **Stimulates activity of CD-8 Killer Cells***
- **Increases endogenous production of T-4 Cells***
- **Increases white blood cell count***

If you've been challenged by patients looking for a better quality of life, for real relief from the effects of immune dysfunction, just ask the doctors: Whitaker, Rountree and Teitelbaum.
