InflaThera™

Support healthy inflammation responses throughout the body.

Inflammation has its pros and cons. Acute inflammatory responses are natural, healing, and normally self-limiting. Chronic inflammation may impede the body's repair mechanisms and damage tissues. By combining nine complementary botanicals that favorably modulate activity of key inflammatory mediators and scavenge free radicals, InflaThera™ helps safeguard against the effects of chronic or hidden inflammation in multiple ways.

- **Modulates activity of NF-kB and proinflammatory cytokines**
- **Reduces inflammatory arachidonic acid metabolites**
- **Helps balance COX and LOX enzymes**
- **Boosts antioxidant defenses against free radical damage**

Individuals who wish to support and protect cardiovascular, neurological, GI, and joint and connective tissue functions may benefit most from InflaThera™.
