

A History of First-to-Market and Innovative Products

Many of the nutritional supplements that have become trustworthy standards for practitioners were discovered, formulated, or brought to the U.S. first by Allergy Research Group®

PURE ARTEMISININ

Allergy Research Group® artemisinin has had independent cell tests verifying its effectiveness. We use HPLC to perform independent potency assays on every batch. It is minimum 98.5% pure, and does not contain thujone.*

MELATONIN

Allergy Research Group® first introduced the U.S. market to melatonin in 1996. Since then we have come out with a variety of melatonin products including Slow Motion Melatonin and a high potency 20 mg capsule.

200 MG OF ZEN

Combination of gamma-aminobutyric acid (GABA) and theanine (glutamic acid gamma-ethylamide), an amino acid derivative found naturally in green tea (*Camellia sinensis*). Together they help support healthy moods and a feeling of calm relaxation.*

ACETYL-GLUTATHIONE

Oral acetyl-glutathione formulation that is stable in the stomach and GI tract, well-absorbed, and able to enter the cells directly and present to the cytosol for mitochondrial entry.* Pure Emothion® glutathione is used as the starting material.

Emothion™ is a trademark of Gnosis SPA.

HI-BIOTIN

Hi-Biotin provides 100 mg of vitamin B7, commonly known as biotin. Biotin is an essential coenzyme for a variety of carboxylation reactions, including the activation of acetyl-CoA carboxylase, a crucial enzyme in the normal, healthy synthesis of myelin.*

ZEN ADAPT WITH SENSORIL®

Enhances the parasympathetic nervous system balancing action of GABA and L-Theanine with the addition of Sensoril®, a pure water extract of ashwagandha, an Ayurvedic herb well known for its ability to help alleviate the physical, emotional, and mental effects of stress and tension.*

BUFFERED VITAMIN C

Stephen Levine, PhD, and Allergy Research Group® pioneered the development of buffered vitamin C products. We continue to offer the purest and least allergenic vitamin C products available.

PROGREENS®

Introduced ProGreens®, an original green drink with grasses, sea vegetables, algae, adaptogenic herbs, probiotics, fiber, and a variety of nutrient-rich superfoods*.

STABILIAM® 200

Contains Garum Armoricum® fish hydrolysate, an extract from the fish *Molva dypterygia*. Stabilium® 200 may be useful for coping with stresses from work or personal life, and can support healthy sleep patterns, energy, memory, and mood.*

NATTOKINASE NSK-SD®

Nattokinase is a profibrinolytic serine protease originally extracted and purified from natto, a traditional Japanese fermented soybean food. Nattokinase NSK-SD® has established standardization and quality levels for all nattokinase, with two Japanese and three U.S. patents, comprehensive safety studies, and proven potency.

NTFACTOR®

NTFactor® contains phosphoglycolipids from soy, in proprietary and scientifically selected ratios of phosphatidylcholine, glycolipids, and other phosphatidyl nutrients, researched and blended to optimize cellular uptake and membrane utilization.*

Patent numbers 8,877,239 and 9,095,507.

ZEN SLEEP WITH P5P AND 5-HTP

Includes the same amounts of GABA and L-Theanine as our best-selling 200 mg of Zen, augmented with vitamin B6 as pyridoxal-5-phosphate (P5P), and L-5-Hydroxytryptophan (5-HTP), the precursor to serotonin and melatonin. The combination helps promote a relaxed state, and provides the necessary factors for the body to produce melatonin, supporting normal, healthy sleep.*
